BUSINESS MANAGEMENT & ANALYSIS

Developer with experience in creating innovative web solutions, focused on delivering highly efficient and accessible E-commerce platforms. Distinguished by my ability to adapt to new technologies and work methodologies, I have contributed to the success of complex projects, continuously improving user experience and operational efficiency. Collaborating with multidisciplinary teams, I am passionate about driving innovation and excellence in every aspect of software development.

KEY COMPETENCIES

Working under pressure

Detail-oriented

TeamWork

Self-motivated

Critical thinking skills

Excellent communication skills

PROFESSIONAL EXPERIENCE

FrontEnd Developer   Centauro Solutions   **Nov 2022 - Present**

- I implemented a robust and scalable platform from scratch, using React for the front-end, GraphQL and Strapi Headless CMS for efficient data management.-
- I have developed expertise in implementing and managing cloud infrastructures using Amazon S3 and Amazon EC2.
- I ensured an accessible user experience across a wide range of devices, from mobile to desktops.
- I developed and implemented integrations of external delivery services using the SOAP protocol, crucial for efficient order management.
- I significantly improved the scalability, maintainability, and performance of the E-commerce project through this modern approach.
- I used Postman to consume external APIs, completing the payment process and ensuring a smooth and functional integration.
- I was responsible for identifying and solving problems efficiently, ensuring the project's smooth execution.
- I collaborated closely with a team of developers and designers, ensuring the timely delivery of high-quality software projects.
- I mastered tools like Visual Studio and version control systems (Git), which allowed me to contribute effectively to the team's workflow.
- I actively participated in an Agile development environment, using Jira Software and SCRUM methodologies to optimize our work process and delivery.
